

WHAT POPVOX USERS ARE SAYING...

POPVOX is an innovative way to participate in a virtual public square with the knowledge that you're influencing decision-makers, as well as having fun and engaging fellow political activists. **I also know that when I express my opinion on an issue, my legislators will receive it in a timely manner, not as a junk mail "petition," but as a relevant communication from a verified constituent.**

P.B., GLEN ALLEN, VA

Congress and Senators are barraged in social media but don't easily know who their constituents are -- the people they listen to. Faxes just pile up because there are not enough staffers to handle reading/sorting them efficiently. Instead, I use POPVOX! **It's a fairly new tool that members of Congress ARE paying attention to and that makes it easy for them to see how their region feels.** And, it is user friendly and quick to use for activists.

KIM W., CARBONDALE, CO

Really like and appreciate the new POPVOX Congress Match. Easy to see where my Senators and Representative are in step with me and where they differ. **I have thoroughly enjoyed POPVOX and the ease at which I can weigh in on bills and know my Senators or Representative receive my input.** Keep up the good work.

TOM A., GRANBURY, TX

I have been using POPVOX since it's inception, and find it to be a very convenient way to let your legislators know exactly how you feel about a bill or issue before Congress. It gives them rapid feedback on the issues, and helps them determine which way to vote. I have found that since using POPVOX, my incoming snail mail from both senators and my representative has increased dramatically. **I feel that I really do have a voice in the halls of Congress.**

GARY N., DUKEDOM, TN

This is a service America NEEDS. The feature that lets you drill down from national to state to district stats is excellent. **The map that is generated summarizing where there is support or opposition for a bill is not only useful, but is beautiful to look at.** I wish more people knew about POPVOX.
